The rubber belt
to shrink all fabrics

Rollin® SD

**The rubber sanforizing belt to shrink all kind of fabrics.
A new reinforced inner face.**

Rollin® SD is a new generation of shrinking belts designed for use on Sanfor machines.

Rollin® SD assures an optimum shrinkage for the most demanding fabrics. Due to its new reinforced inner face, Rollin SD® always guarantees better reliability and longer life for your rubber belt.

Key Performances

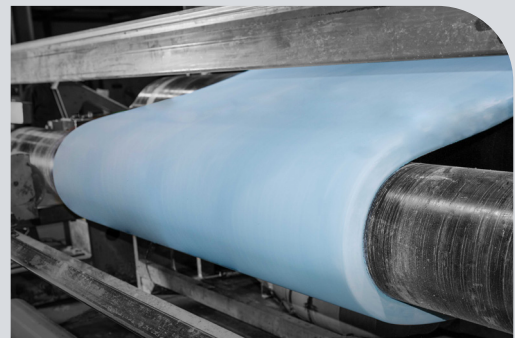

- Multilayer structure
- Specially designed for severe working conditions
- Longer life between grindings
- Improved mechanical resistance of the inner face (lower risk of abrasion and cracks)

Technical Specifications

- Internal development: 3962 mm
- Thickness: 67 mm (other thicknesses on demand)
- Width: 1400 to 3600 mm
- Structure: multilayer
- Hardness of outer face: 38 Shore A

Technical Services

- Our technicians are available for :
 - Check up of equipment and advise to improve production efficiency
 - Maintenance (grinding, repair)
 - Training for (on site) operations and maintenance staff
 - Technical advice (by mail or telephone)
- A comprehensive user and maintenance manual
- A repair kit proposed in case of incident on machine
- An international network - 20 countries
- A reactive sales and technical organization to manufacture rubber belts within very short time in case of emergency

Production of rubber belts
